

## Software overview

Straight forward and secure, OptiAuthor® is a standalone or network-based software solution to complement your high volume transactional output management infrastructure.

OptiAuthor offers native ingestion for 3211 print streams, AFP and PDF; and the processing of other industry standard formats through third party transforms. Features include dataset creation for archival and distribution on portable media (CD/DVD), high security encryption and password protection, as well as a robust and versatile viewer for “on media delivery” or through independent download via your network.

Organizations such as financial institutions, healthcare providers and government agencies, as well as corporate departments such as Accounting, Human Resources, Legal, Technical Support and Customer Service trust OptiAuthor® software for quick, secure archival and access to information for improved tactical decision making, regulatory compliance, increased productivity and customer support.

## OptiAuthor® software

### Features

### Benefits

Server/Network-based

Get access to information via a network or through portable media (CD/DVD)

Scalability

May be installed as standalone system or in clusters

Encryption options

Distribute confidential documents securely, with user and group security distinctions down to the report level

High volume capacity

- 20,000 3211 pages/minute\*
- 3,000 PDF pages/minute\*

Customizable, intuitive viewer

Query 1000s of documents simultaneously

PC/Server based

Runs on your current infrastructure

Time saving wizards

Integrate with systems and processes in hours, not months

Can be integrated with Kofax®\*\* for industry leading scanning capabilities

Reap the benefits of an integrated document management system including images

Template edition and template library

Save time setting up a new application

Easy to install and custom configurable with centralized administration

Low total cost of ownership

\* Exact speed may vary depending on document complexity, system configuration, and procession capacity.

\*\* Kofax® products must be purchased separately

## OptiAuthor® solutions

### Financial, Brokerage and Insurance

Archive and distribute client statements, tax documents and key transaction confirmation notices securely to your customer support and legal department, or encrypt and distribute trade information economically on media (CD/DVD) to remote advisors/brokers.

### Education

Whether university, school district, or community college, fulfill your archival requirements in a manner that allows easy access to documents and data for secondary use of that information; e.g. compliance and student inquiries.

### Pharmaceutical & Medical Offices

Improve controlled access to protected patient data, consolidate records and streamline processes under HIPAA guidelines while reducing overhead costs.

### Service Bureaus

Facilitate your customer's compliance needs with easy application set-ups and highly automated job controls.

## OptiAuthor® technical specifications

OptiAuthor® software is built on industry standard technologies, Microsoft® .NET and Java, featuring a modular and enterprise scalable design. The OptiAuthor® application is deployed as Microsoft® Windows®-based services and executables within IIS and Apache Tomcat based on Microsoft® SQL Server™ 2000 or 2005.

Production server

Microsoft® Windows® Server 2003  
Internet Explorer 6.0 or later  
2 GHz processor, 2GB RAM 150MB install space

Viewing application

Microsoft® Windows® XP or later  
90 MHz processor, 128MB RAM  
130MB install space
