

## OptiWeb® software

OptiWeb® is a user-friendly, robust and secure Web-based Enterprise Report and Document Management solution providing you with all you need to manage your high volume transactional print output for secure digital archival and publishing; online and/or on portable media (CD/DVD).

OptiWeb® combines electronic document management features with a browser-based interface, offering state of the art search facilities and excellent image fidelity.

- Supports a variety of ingestion formats natively including: PDF, AFP, Kofax®-scanned images, 3211 line data, ASCII/EBCDIC text; and with third party transform tools LCDS, metacode, XML, postscript and AFP\*. \*after indexing and only for archival and search!
- Delivers search capabilities for individual documents and sets of documents (reports).
- Provides search result retention and export via email, print, fax or export through a local system using secure File Transfer Protocol (FTP).

## OptiWeb® features and

### Features

### Benefits

Web-based

Easy, 24 hour online access to information

PC/Server based

Runs on your current infrastructure

AES encryption/Access security

Distribute documents securely, define security access by individual, groups and at the report level

Industrial capacity

Index creation\*
• 20,000 3211 pages/minute
• 3,000 PDF pages/minute

Index extraction

55,000 Keys per/minute

Customizable, familiar interface

Create and automate reports and query millions of documents

Time saving wizards

Integrate with systems and processes in hours, not months

Centralized administration

Simple to deploy, manage and support

API with Kofax®\*\* for industry leading scanning capabilities

Added ingestion stream for integrated document archival and presentment

Template editing options and template library

Easy re-use of report templates

Customer configurable

Moderate total cost of ownership

Enterprise scalability

Modular design to expand and grow with you

\*Exact speed may vary depending on document complexity, system configuration, and hardware capacity.
\*\*Kofax® products must be purchased separately

## OptiWeb® solutions

### Financial, Brokerage and Insurance

Archive and distribute client statements, tax documents and trade confirmations securely online to your clearing organization, customer support and legal department or encrypt, download and distribute data on media to remote brokers.

### Education

Whether university, school district or community college, preserve everything from accounting records to student records, including employee files with high availability distributed over the Web or on CD/DVD, to better serve your students, faculty and staff.

### Pharmaceutical & Medical Offices

Improve controlled access to protected patient data, consolidate records and streamline processes under HIPAA guidelines while reducing print overhead costs.

### Telecommunications

Take connectivity to a whole new level by communicating crucial account and usage information online to your clients.

## OptiWeb® 4.0 technical specifications

OptiWeb® software is built on industry standard technologies, Microsoft® .NET and Java, featuring a modular and enterprise scalable design. OptiWeb® is deployed as Microsoft® Windows®-based services, executables and Web services executing within IIS and Apache Tomcat based on Microsoft® SQL Server™ 2000 or 2005.

Database load installation group	Microsoft® Windows® Server 2003 Internet Explorer 6.0 or later 2 GHz processor, 2GB RAM 150MB install space
Database load installation group	Microsoft® Windows® Server 2003 Internet Explorer 6.0 or later Internet Information Services (IIS) 2 GHz processor, 2GB RAM, 150MB install space
Production applications and media production installation group	Microsoft® Windows® Server 2003 Internet Explorer 6.0 or later 2 GHz processor, 2GB RAM, 350MB install space
End-user requirements for OptiSearch	Microsoft® Windows® XP or later Internet Explorer 6.0 or later Adobe® Acrobat® 6.0 or later
End-user requirements for OptiWeb® MediaView	Microsoft® Windows® XP or later 90 Mhz processor, 128MB RAM 130MB space for OptiMedia™
